PROFESSIONAL PROFILE

I'm a QA Engineer Jr. who enjoys manual, web, and API testing, with growing hands-on experience in automation (Python, Pytest, PyCharm). I bring a 15-year background in quality management (ISO 9001, ISO 27001), a track record of zero critical findings across global quality audits, and strong attention to detail: test case design, functional testing, defect lifecycle management with JIRA, and cross-browser/API validation. I also enjoy working in teams, training others, and communicating clearly with managers and directors.

TECHNICAL SKILLS

Testing Types: Manual Testing, Functional Testing, Regression Testing, Cross-browser Testing, Mobile App Testing (Android Studio)

Test Design & Documentation: Test Case Design, Test Planning, Defect Lifecycle Management, Bug Tracking

API Testing: Postman, REST & JSON

Automation: Python, Pytest, Selenium WebDriver, Page Object Model (POM)

Databases & Tools: SQL & PostgreSQL, Linux Command Line, Git & GitHub, JIRA

PROJECTS

Final Project – Urban Scooter (End-to-End QA) | TripleTen Bootcamp (2026)

Executed end-to-end QA across a full ride-booking platform (web, mobile, API, and backend): built a detailed requirements mind map, designed test cases using equivalence classes and boundary values, completed a full QA theory assessment (HTTP, JSON, SQL joins), and tested web (multi-browser), mobile (notifications, connectivity loss), and backend API endpoints.

Tools: JIRA | Equivalence Partitioning | Boundary Value Analysis | Cross-browser Testing (Chrome, Opera) | Android Studio Emulator | API/Backend Testing | Mind Mapping | SQL

Result: Documented 81 defects across web (34), mobile (9), and API/backend (38) in JIRA; delivered a comprehensive requirements mind map with clear identification of requirement gray areas and consistently professional, reproducible bug reports.

API Test Automation – Urban Grocers | TripleTen Bootcamp (2026)

Automated a 9-case checklist validating the product-kit creation endpoint of the Urban Grocers API in Python, using a modular framework (config, data, request senders, and test files) and version-controlled the project on GitHub.

Tools: Python | Pytest | Requests | Git & GitHub | PyCharm | REST API Testing

Result: Delivered 9 independent, reusable automated tests covering boundary values, invalid types, and missing fields, with clear method naming, readable assertions, and a modular, maintainable structure. **GitHub:** github.com/yusistely-luna/qa-project-Urban-Grocers-app-es

UI Test Automation – Urban Routes | TripleTen Bootcamp (2026)

Built a Selenium WebDriver framework using the Page Object Model to automate the full taxi-booking flow of the Urban Routes web app – setting the route, selecting a tariff, adding a phone number and payment card (via SMS/CVV handling), and requesting a driver.

Tools: Python | Selenium WebDriver | Pytest | Page Object Model | Git & GitHub | PyCharm

Result: Delivered 11 automated end-to-end tests with locators and page logic fully separated from test code, applying clean, maintainable coding practices for stable, reusable test execution. **GitHub:** github.com/yusistely-luna/qa-project-Urban-Routes-es

Additional bootcamp projects: Manual web testing (Urban Routes), manual API testing (Urban Grocers), mobile app testing (Urban.Lunch), and Linux/SQL server-log analysis (Chicago Taxi DB).

PROFESSIONAL EXPERIENCE

Tupperware México | Lerma, MEX | Quality Management System Manager 04/2024 – 01/2026

Manufacturing company – plastic consumer products

- Automated non-conformity notifications and recurring closure reminders using Microsoft Power Automate, reducing average closure time from 12 to 3 months and improving on-time closure rate from 30% to 90%.
- Spearheaded more than 10 quality, social, and environmental audits achieving a 15% reduction in internal non-conformities, eliminating all critical findings in a Disney external audit (0 critical non-conformities), and improving Costco's Good Manufacturing Practices audit score from 92% to 98%.
- Drove continuous improvement of the Quality Management System used by more than 50 employees by resolving internal quality complaints through root cause analysis; led ISO certification Phase 1 approval, leaving all documentation ready for a successful Phase 2 audit.

Total System Services de México | Toluca, MEX | Functional QA 11/2023 – 04/2024

IT services and software development company

- Identified and documented 10–30 defects during manual QA testing for an internal Finance Department system, coordinating bug resolution directly with the vendor through structured defect reports.

Total System Services de México | Toluca, MEX | Administrative IT Coordinator 08/2018 – 11/2023

IT services and software development company

- Supported the Software Development team in implementing ISO 27001 requirements, acting as Internal Auditor and driving full certification, an achievement formally recognized by the external auditor to Senior Management.
- Led IT projects in collaboration with technical and business teams to strengthen information security compliance with ISO 9001:2015, ISO 27001:2013 and PCI-DSS standards.

DuPont Productos Agrícolas | Lerma, MEX | Warehouse Supervisor 05/2017 – 08/2018

Agricultural chemicals manufacturing

- Led a team of 20 people ensuring compliance with ISO 9001:2015 standards and supply chain performance metrics.
- Secured ISO 9001:2015 recertification by implementing turtle diagrams and risk analysis across warehouse operations, ensuring full compliance with the updated standard requirements.

DuPont Productos Agrícolas | Lerma, MEX | Production Supervisor 01/2011 – 05/2017

- Led a team of more than 30 people to achieve safety, productivity, quality, and cost objectives in manufacturing operations.
- Conducted more than 20 internal ISO 9001 audits across both roles, ensuring sustained compliance with quality management standards.

Procter & Gamble Planta Vallejo | Mexico City, MEX | Process Engineer 03/2010 – 12/2010

- Analyzed production waste and led the material supply team to generate improvement action plans.

EDUCATION & CERTIFICATIONS

QA Engineer Bootcamp – TripleTen Latam 2026

Industrial Engineering – Tecnológico de Monterrey, Campus Toluca 2009

Certifications:

- Executive Coaching – Tecnológico de Monterrey (2022)
- Top 10 de OWASP Training – ONESEC (2023)
- Internal Auditor ISO 27001 (2019)
- Internal Auditor ISO 9001 (2018)
